

# Penetrating Spray

Graphite formulation that lubricates mechanisms blocked by corrosion

## Product Description

Penetrating Spray is a penetrating, fast acting lubricant containing solid graphite. Penetrating Spray is made from corrosion and moisture resisting, lubricating agents. Penetrating Spray contains graphite; it penetrates, lubricates, repels moisture, protects against rust and prevents seizing. Penetrating Spray is an aerosol that can be used in any position.

### Product Features:

- Penetrating Spray is particularly recommended for loosening rusted mechanisms (screws, bolts...).
- Penetrating Spray lubricates surfaces quickly and penetrates the most seized or rusted metal parts for easy disassembly.
- Penetrating Spray has many uses, for example, eliminating unpleasant noise, lubricating chains, temporary rust protection etc.

### Handling:

- For information about safe handling and use of this product, refer to the Material Safety Data Sheet.
- Caution pressurized container: protect from sunlight and other heat sources.

### Shelf life:

- 3 years after manufacture
- Manufacture date can be identified from bottom of bottle as follows: Julian date code – DDD/YY Time – TT:TT Product code – 765XXX

## Typical Inspections Data:

Appearance	Liquid
Colour	Black
Propellant Gas	Butane/Propane
Volume	500 ml
